

1.

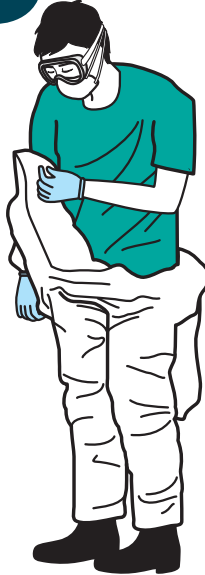

Unstick any storm or chin flaps before completely unzipping the coverall. Take care not to touch any skin.

2.

Using both hands, grasp the hood of the coverall at the temple. Roll it backwards, to the rear of your head.

3.

Touching the inside of the coverall only, free your arms. Pull both sleeves down from the shoulder to the hand, one at a time.

4.

Once both arms are free, roll the coverall down to the top of your footwear - turning it inside out as you do so.

5.

Step out of the coverall one leg at a time. Use the opposite foot to hold the coverall down as you remove each leg.

6.

Step away from the coverall. Place into a refuse bag and seal. Dispose of it safely in the recommended refuse unit.
